## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-6, 8-13, 15-18, 20-25, and 53-57 are allowed over the prior art of record as amended in the 5/24/2009 reply.

The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed device of a device and method for transporting fluids across biological tissues that enhances penetration of a biological tissue by the use of directional insertion with asymmetric microneedles. Additionally, adhesion followed by alteration of contact geometry is used to stretch the biological tissue across the microneedles, thereby also enhancing penetration depth.

The closest prior art of record is Palmer (USPN6,537,242) and Olson (US2003/0009113), however these references do not disclose the device as claimed or described above.

Regarding claims 1, 13 and 53, the closest prior art of record fails to teach among all the limitations or render obvious the fluid transport configuration with the specifics of the displacement mechanism that causes for directional insertion of the microneedles.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
